

## Final Erasmus+ Project Celebration Germany: "The city we live in - the city we want to live in in 2020"

Today, 14th of July, was our last day at school before the summer holidays.

Our headmaster Mr. Daniel Norkowski presented the Europasses Mobility to all our students who travelled to our partner schools in Austria, Spain, France and Athens during the last two years. He praised the students` high level of motivation and dedication towards our Erasmus+ project.

26 of our THS students went on a Learning, Teaching and Training Activity and 5 were lucky and even travelled twice to our project partners.

All 26 students worked very hard during our 24 months project, spending their free time on tasks allocated by our heavy work program, such as making films about their city, writing English poetry and learning a new language, for example Spanish.

All 26 students worked very hard during our 24 months project, spending their free time on tasks allocated by our heavy work program, such as making films about their city, writing English poetry and learning a new language, for example Spanish.

Students presented their project during parents days, open days and chronologically over the last two years by conducting exhibitions, competitions and having info stalls so people could ask questions about our project.

The most recent occasion was during our THS summer fair on 8th July, where we displayed some information boards with pictures of our activities, products and mobilities and of course all Erasmus+ students were available for answering questions.

A big thank you to all parents, students, teachers and helpers for working hard during our project period. The whole school community has been involved in many tasks for the project, and that is why we celebrated such successes.

Many parents and students were enquiring about another Erasmus+ project in the future.

As we have been such excellent project partners, we are hoping to work together again in 2018. We already have some great ideas...
